

# Eitel Krauss

Developer, Designer. Likes the outdoors, cooking and FOSS.

Currently frontend engineer at [Eclipsoft](#). Based in Guayaquil, Ecuador.

## [Soft]skills

- ☐ Natural problem solver
- ☐ Great with people
- ☐ Can take a leading role when needed
- ☐ Responsible and dedicated (bit of a perfeccionist too)
- ☐ Always learning new tools and tech without compromising on principles or common sense
- ☐ Passionate about software engineering

## Stack

- ☐ Hybrid web applications with Vue and [Nuxt](#)
- ☐ Web Components with [Lit Element](#)
- ☐ Static sites with [Astro](#)
- ☐ Typescript
- ☐ HTML & CSS
- ☐ Strong graphic design and UX base
- ☐ Basic linux sysadmin skills
- ☐ Deployment on linux servers with nginx
- ☐ Cloud providers like Vercel, Netlify, Cloudflare

# Experience

Frontend Engineer @ [Eclipsoft](#)

2022 - Present

Projects:

☐ [Onboarding](#)

A hybrid (SSG/SSR/SPA) web app built with Nuxt.js. It's a template for companies to implement an onboarding process with their own branding system. We integrated [ID4Face](#) to handle face recognition and liveness validation.

Forms are rendered dynamically from a JSON provided by an API and can be edited on the admin site like a CMS.

☐ [ID4Face](#)

We used [Lit.dev](#) to build a web component (in this case a modal) for liveness validation and face recognition using an ML model (facemesh). The user can provide a base64 image for reference or use an integrated service that queries the end user's data from the national registry office in Ecuador and uses the image stored in their database for the comparison. You can try it by uploading a picture to use as reference image.

☐ Branded CSS design system

Worked closely with the design team to implement stylesheets to be shared across all company products to keep a consistent branding style

## *Web Developer and Designer @ Freelance*

2017 - 2022

### Projects:

☐ [BCHWOOD.COM](https://bchwood.com)

An E-commerce site built with Vue JS. It uses a headless CMS for the backend with [Strapi.io](https://strapi.io) It implements Paymentez which is a LatAm based payments processor.

## Education

*Design and Visual Communications @ Universidad Casa Grande*

Guayaquil, Ecuador 2013 - 2017

**Deutsche Schule Guayaquil**

Guayaquil, Ecuador 2007
